

Abdulahman Bakhit

Doha, Qatar | 55305050 | dahop47@gmail.com | github.com/mcdahoomy | mcdahoomy.github.io/portfolio/

SKILLS

- Java (OOP), Python
- JavaScript, HTML, CSS
- Linux & networking basics
- Scripting & debugging (logs/CLI)

SECURITY

- Kali Linux (intro labs)
- Wi-Fi security testing (owned network)
- Basic network scanning & packet analysis
- Security hygiene: updates, strong creds, access control

TOOLS

- Git/GitHub
- Docker & Portainer
- Proxmox VE, TrueNAS
- Pi-hole (DNS), Nginx Proxy Manager

CERTIFICATIONS

- IELTS: 7.5

SUMMARY

Cybersecurity-focused Computer Science student at Qatar University (expected 2028-2029). Hands-on with Linux, networking fundamentals, and home-lab infrastructure. Comfortable troubleshooting real issues using logs and CLI tools, and building small utilities in Python/Java. Practiced security concepts in a legal lab environment (Kali Linux; Wi-Fi testing on an owned network).

EDUCATION

Qatar University — B.Sc. in Computer Science (Expected 2028-2029)
Doha, Qatar

PROJECTS

Homelab Infrastructure & Network Services (Proxmox + Docker + TrueNAS + Pi-hole)

- Deployed and maintained self-hosted services using virtualization and containers.
- Diagnosed DNS/connectivity issues using logs and tools (ping, nslookup), improving reliability.

Security Practice Lab (Kali Linux; owned network)

- Explored fundamentals through controlled labs: Wi-Fi configuration auditing and password-strength checks.
- Documented findings and remediation steps (e.g., stronger credentials and secure encryption settings).

Web & OOP Projects (TaskHub + University Java systems)

- Built a task manager web app with search/filtering and import/export; debugged UI issues.
- Implemented spec-driven Java OOP systems with validation and clean class design.

EXPERIENCE

University & Personal Projects — Doha, Qatar

- Completed projects across security labs, Java/Python development, and homelab operations.
- Work style: implement, test, debug, document, and iterate for stability.
